

# Endress+Hauser dedicates new building in Mexico

New business facilities align fully with the needs of customers and employees

**Endress+Hauser Mexico has invested roughly 10 million euros in a new building. The recently occupied sales and service center is located in Naucalpan in the Mexico City metropolitan area. With 4,100 square meters of usable space, the center includes modern office facilities, an extensively equipped customer experience and process training center and a complete calibration lab.**

## **Strengthening customer relationships**

The new building in Naucalpan reflects the solid growth of the Sales Center in recent years. It demonstrates a connection with the market and customers and enables further growth. At the heart of the building is a process training center where customers can practice using a variety of measurement instruments and simulate conditions similar to their own operating environments. Working together with experts from Endress+Hauser, they can then develop new solutions for their applications.

## **Attractive work setting**

The building features numerous spaces and facilities designed with the needs of the employees in mind, allowing them to flourish and feel at home in their new work environment. The amenities include a gym, a nursing room for mothers, and a library, plus various places for individual and collective work in open spaces to ensure that the day-to-day work activities can be carried out in a productive and attractive setting.

## **Focus on sustainability**

Endress+Hauser places a value on sustainability and energy efficiency with all of its construction projects. The new building in Mexico thus features solar panels. In addition, a water treatment and cleaning system was developed that feeds 7.2 cubic meters of water into the climate control and plumbing systems on a daily basis. Because of these measures, the new building was certified gold under the LEED system (Leadership in Energy and Environment), proving that it achieves significant energy and resource savings over its lifetime.

The Mexico Sales Center also places high value on sustainability and the well-being of employees.

## **The Endress+Hauser Group**

Endress+Hauser is a global leader in measurement and automation technology for process and laboratory applications. The family company, headquartered in Reinach, Switzerland, achieved net sales of approximately 2.9 billion euros in 2021 with a total workforce of more than 15,000.

Endress+Hauser devices, solutions and services are at home in many industries. Customers thus use them to gain valuable knowledge from their applications. This enables them to improve their products, work economically and at the same time protect people and the environment.

Endress+Hauser is a reliable partner worldwide. Its own sales companies in more than 50 countries as well as representatives in another 70 countries ensure competent support. Production facilities on four continents manufacture quickly and flexibly to the highest quality standards.

Endress+Hauser was founded in 1953 by Georg H Endress and Ludwig Hauser. Ever since, the company has been pushing ahead with the development and use of innovative technologies, now helping to shape the industry's digital transformation. 8,600 patents and applications protect the Group's intellectual property.
